

## PRESS RELEASE

### EMRaDi project closing event: Optimising pathways of rare diseases patients thanks to cross-border cooperation in the Euregio Meuse-Rhine

After more than three years of cross-border cooperation, on **17<sup>th</sup> February**, the partners of the EMRaDi project (Euregio Meuse-Rhine Rare Diseases) will present their achievements in the optimisation of pathways for patients with a rare disease in the Euregio Meuse-Rhine at the **Palais des Congrès in Liège**.

MEP Pascal Arimont will give the opening speech of the day, which will be followed by presentations of the activities carried out and the results achieved. Afterwards, health insurers, patient organisations and university hospitals active in the Euregio Meuse-Rhine will sign a Declaration of Intention to show their commitment to deepen their collaboration. The day will come to a close with a panel discussion and an exchange with the participants on the next steps and challenges to address in future projects.

We warmly invite the press to attend the event. The full programme of the event is available on [www.emradi.eu/en](http://www.emradi.eu/en).

The EMRaDi project is part of the European Union INTERREG V-A Euregio Meuse-Rhine programme and is financially supported by the European regional development fund (ERDF), as well as by the Belgian, Dutch and German regional partner authorities. The Interreg V-A Euregio Meuse-Rhin (EMR) programme invests almost 100 million euros in the economic and territorial development, innovation and social inclusion of this cross-border region, where over 5.5 million people live.
